

Growing Minds

**DOES YOUR CHILD LIKE TO PLAY MEMORY GAMES?
IS YOUR CHILD 6 OR 8 YEARS OLD?**

We invite you to participate in our study on **Growing Minds**. This longitudinal study looks at development over time in children's memory and problem solving skills.

We are recruiting children **born in Canada** who will be **turning 7 or 9** in the period between December 2010 and June 2011.

The study involves a series of 1 hour sessions. These will take place in our lab at York University or another convenient location. We will compensate you for travel expenses, and children will receive a token of appreciation.

For further information or to volunteer for the study, contact Dr. Janice Johnson,
